Extrusion Profiles

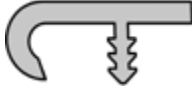

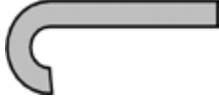

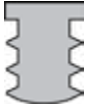

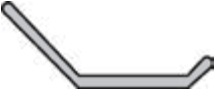

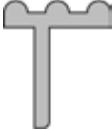

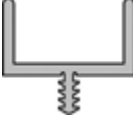

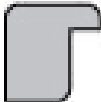

# Extrusion Profiles

We have a technical development office specialized in tools and mould development, which allow us to create extrusion profiles to satisfy any need of our clients.

Currently, we have more than one hundred different designs of technical profiles, many of them accompanied by injection parts, with which we can offer complete solutions for the development of new products, not only for the extrusion profiles, but also when injecting parts in plastic or aluminum.

We work these profiles for different sectors, from alternative energies, industrial facilities or the furniture sector, among others.

|                               |   |   |
|-------------------------------|---|---|
| <b>Back joints profiles</b>   | 519/520  |   |
| <b>End profiles and trims</b> | 600       | 650        |
|                               | 542       | 543        |
| <b>Handle profiles</b>        | 560       | 561        |
| <b>Track cabinet profile</b>  | 525/526   | 025        |
| <b>Damper glass profile</b>   | 950     |   |
| <b>Glass support</b>          | 030     | 540/541  |
| <b>Dampers</b>                | 250     |   |
| <b>Showcase mouldings</b>     | 801    |   |
