Tambour doors KIT

# Track system

## WOOD CABINET

This system is made up of a set of 90° and 180° curves that, when combined with our guide profiles, allow us to offer the perfect guide system to be fitted into wooden cabinets.

The entire guide system is available in both 8mm (blinds 051) and in 12mm (blinds 064).

The entire system is made of polyamide PA6 in order to guarantee comfortable sliding of the tambour doors.

| COMPONENT                         | GUIDE FITTED WOODEN CABINETS |                   |
|-----------------------------------|------------------------------|-------------------|
|                                   | REF. SYSTEM 8 mm             | REF. SYSTEM 12 mm |
| Shutter guide profile 8 and 12 mm | 053-000                      | 052-000           |
| Curve guide 90°                   | 007-08                       | 008-12            |
| Curve guide 180°                  | 009-08                       | 011-12            |
| Center stop                       | 13-080                       | 14-12             |

# Track system

## STEEL

This system is made up of a set pieces called the spiral track, which include a spiral for rolling up the shutter profiles

The available sizes for the spiral tracks are 8mm and 12mm.

The entire track system is made of polyamide PA6 in order to guarantee a graceful slide when using the set of tambour doors. The tracks are screwed on fixing wings located at the ends.
