PRODUCT

Our excellent-quality extruded PVC and ABS edgebands meet all requirements in order to satisfy national and international industry demands. As manufacturers, we take customization to the next level at Protecnic. We work with thicknesses ranging from 0.4mm to 3mm and with any width up to 135mm. Our designs are subject to our customer's preferences and due to our collaborations with the most demanded melamine board brands we replicate the latest releases anticipating our clients' needs.

Decors. We work directly with some of the main melamine board manufacturers such as KRONOSPAN, TABLEROS HISPANOS, SONAE, EGGER, FINSA, LOSAN, SUDESA among many others. We can make the “perfect match” for any design in a few days at no cost to our clients.

With our wide array of samples you will be able to find the design that best fits your preferences and needs. We create designs of all types with more than 50 decoration rollers in order to imitate any wood seam or effect, as well as a selection of more than 40 finishes to create the most similar textures to the board.

Digital printing – Our digital printer allows us to replicate any design to perfection, no matter how complicated...**Truly, the sky is the limit!**

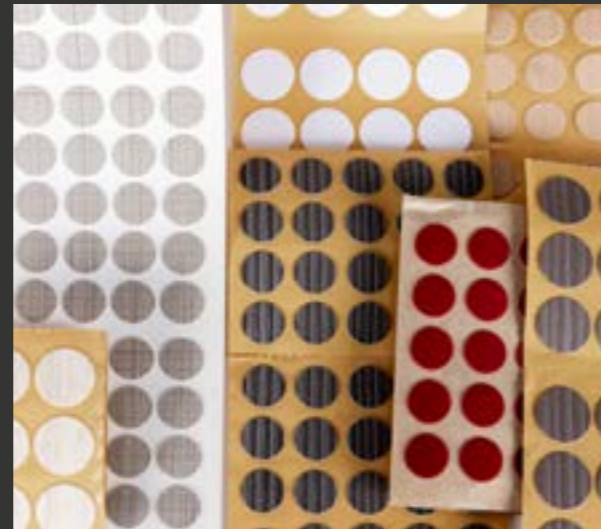

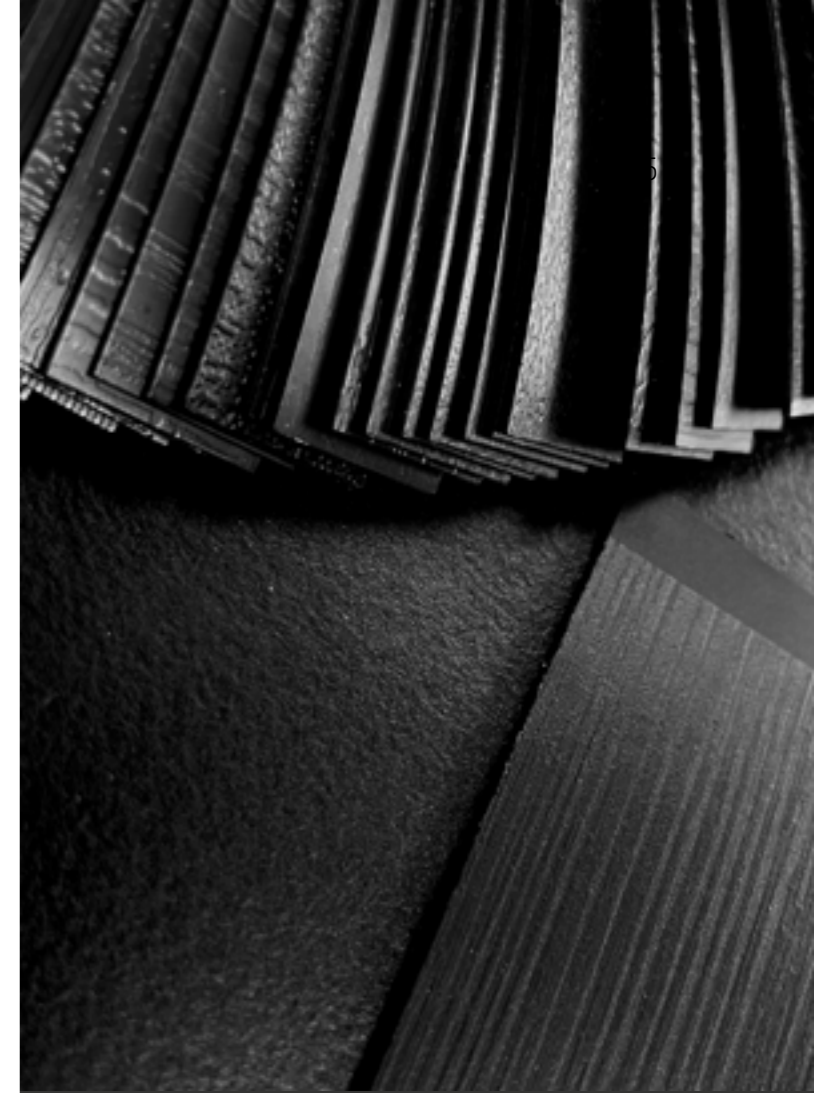

Matte, high-gloss, duo edgebands and metallics make our line complete.

Accessories

We produce a variety of accessories in order to satisfy our clients' needs, such as screw covers that blend in with panel designs and hot-air laser edges that create perfect bonds with the "0 Joint" effect which protect the product from beginning to end.

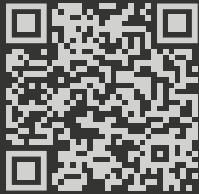

TEXTURE GALLERY

Protecnic offers superior options when it comes to product customization. With more than 40 textures in our catalogue, we can replicate any finish so that it seamlessly matches with the design.

New finishes to complete our collection
